Work Experience

IT Creation   March 2021 – Present
Founder | Logo & Graphic Designer | Web Developer

- Founded and manage IT Creation, offering professional logo and graphic design services to clients across various industries.
- Designed over 300 creative projects including logos, business cards, packaging designs,social media ads, and branding assets for various clients.
- Led and manage a small team of graphic designers, ensuring design consistency, quality, and timely delivery of projects.
- Engage with clients primarily through Facebook, promoting services, showcasing portfolio work, and growing an organic audience.
- Create and share design tutorials on YouTube, contributing to the design community and helping others improve their skills.

Projects

Cre8tionNet   *https://cre8tionnet.up.railway.app*

A full-featured **digital asset platform** where users can browse, download, and manage creative resources. Designed with a seamless user experience and built using the **MERN stack**, Zustand, and Cloudinary.

- Developed a fully functional **user authentication system** with **email verification code** using Brevo and Nodemailer.
- Built a **secure user dashboard** with settings management (change name, username, reset password, upload profile image, delete account).
- Implemented **digital product downloads** with secure ZIP source file handling via Cloudinary.
- Designed **recent activity features**: recent product views, search history tracking, and product likes.
- Integrated **admin panel** with full CRUD operations, debounced search, and product management tools.
- Deployed project using **Railway** and managed hosting across modern cloud platforms.

IT Creation Profile Website   *https://itcreation.netlify.app*

A multi-page personal portfolio website designed to showcase graphic design and web development works under IT Creation, built with modern frontend tools and animations to deliver a visually engaging experience.

- Designed and developed a responsive, multi-page portfolio to showcase over 300+ graphic design works and services
- Integrated a **contact form with EmailJS** to enable direct email communication from visitors.
- Showcased design projects using interactive UI components like **Framer Motion Swiper**, **React Auto Glide**, and **fslightbox-react**.
- Organized project categories and content with clear navigation and a modern visual layout.

Invoice Generator Authorization App   *https://invoicegeneratorbyzin.netlify.app*

A modern, responsive invoice management tool designed for freelancers and small businesses. Built with **React**, **Tailwind CSS**, and powered by a **Laravel-based backend**, the app enables secure invoice creation, search, and PDF downloads.

- Developed a dynamic UI using React, Zustand, and Tailwind CSS; implemented user authentication and protected routes.
- Integrated Laravel API using Axios and SWR for secure, real-time data handling and optimized performance.
- Added PDF invoice downloads, debounce search, and skeleton loaders for smooth, professional UX.

Memory Match Game   *https://memorycheckgame.netlify.app*

An interactive memory card game built with **React**, **Tailwind CSS**, and **Context API** to improve focus and memory skills.

- Developed a responsive game interface with win detection, preview phase, pause/resume, and animated confetti celebration.
- Managed game logic and state (timer, flipped cards, score, game status) using Context API for seamless interactivity.
